

I drive truck back and forth across the country and cannot always get a radio station to be able to find road and weather information when I want to know what is going on in different areas. Also I listen to a lot of talk radio and many areas don't carry the shows that are available on satellite radio. I pay a monthly fee to listen to what I want when I want and that should be my right. The NAB should start providing what the listeners want to here rather than what THEY think the listeners should be listening to. I urge you to reject the NAB pitition 04-160 as our right to listen to what we want to listen to when we want to listen to it . Thank you.
